

Slim Type Hanging Exhaust Fan

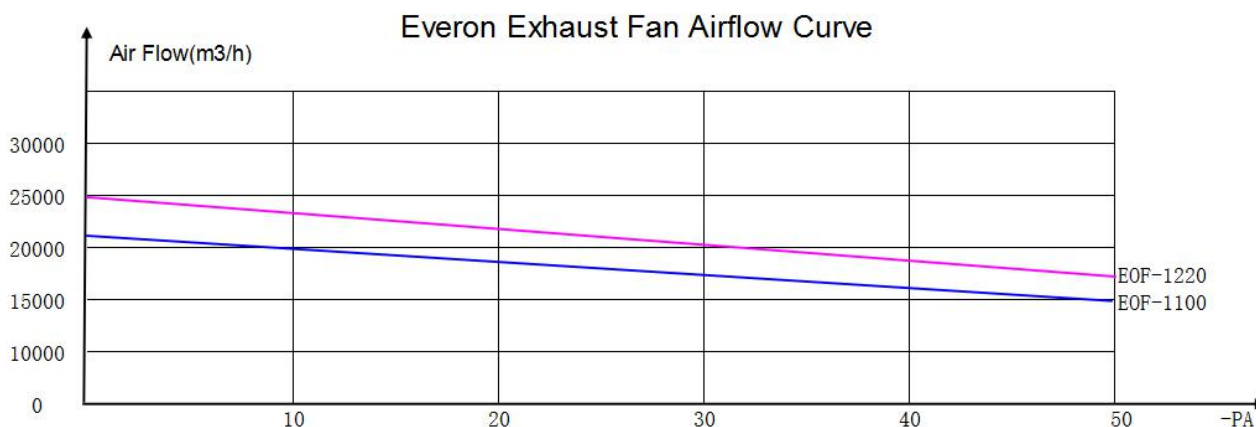

Features:

- 1) Fan blade is made of mirror stainless steel by punch forming, large air volume, no deformation, no dust, attractive and durable.
- 2) Round frame use hot-dip zinc coated 275g/sqm galvanized steel to ensure never rust. Flanging edge back flow design increase ventilation, reduce vibration and noise, improve fan's stability.
- 3) Motors with aluminum-magnesium alloy housing, good heat emission, high efficiency, reasonable dimension, light weight, low current, big torque.
- 4) Fan blades are adjusted by intelligent dynamic balance device, ensure smooth running, low vibration, less noise, increase stability and service life.

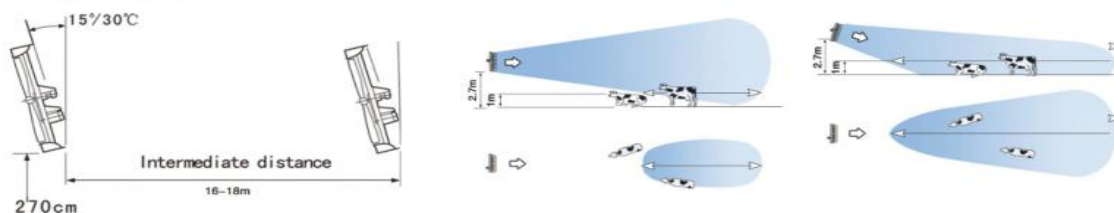

Parameters:

Model specifications	Diameter blades- mm	Blades rotationa l speed- rpm	Air flow m3/h	Noise decibel s	Import power - W	Rated voltage- V	High mm	Width mm	Thick mm
EOF(f)-1100	1000	700	21000	≤64	400	380	1100	1100	300
EOF(f)-1220	1100	530	25000	≤64	670	380	1220	1220	300
